

MORSØ 1410 COAL STOVE

The Morsø 1410 Coal Stove is a small and powerful heater that is the perfect heat source for areas up to 800 sq. feet. It is a versatile coal burner that can burn both anthracite and bituminous coal, providing up to 15 hours on a single load of anthracite.

The 1410 Coal Stove is easy to operate and gives you a large uncluttered fireviewing area. The articulating grate system and easily accessible ash pan makes ash removal a snap. It's small footprint, miniscule clearances and reversible 6" flue collar for top or rear venting allows you to keep the 1410 Coal Stove close to a wall without taking up valuable room space. The 1410 Coal Stove is constructed of heavy-duty high quality cast iron and its firebox is lined with rugged firebrick.

Why cast iron? The appeal of cast iron lies not only in its ability to absorb heat from the fire and releasing it slowly into your home long after the fire is out, but also in the aesthetically pleasing forms with which it can be shaped. Morsø craftsmen produce the finest cast iron wood stoves in the world. The name Morsø has been synonymous with quality since April 1853. In 1915 Morsø received the honor of being appointed to the Royal Danish Court. This prestigious appointment means that the products produced are held to the highest standards of quality and that the companies themselves have demonstrated exceptional business practices and ethics.
